

Rising Pasture Plate Measures to calculate feed volume

Blackwood Park

8-Nov-16

Sheep Paddock North

Initial reading	3400
End reading	4228
No. of reads	70

Average reading height	11.83
------------------------	-------

kgDM/ha	2528
---------	------

Carrot Paddock

Initial reading	4300
End reading	5289
No. of reads	70

Average reading height	14.13
------------------------	-------

kgDM/ha	2827
---------	------

Conversion:

Late spring and early summer
(during stem growth)

*Rising Plate Pasture Meter reading x
130 + 990 = pasture cover (kg DM/ha)*
